

HOMELITE®

40" GRADER BLADE for T-7 & T-8 Tractors

ASSEMBLY INSTRUCTIONS PARTS LIST

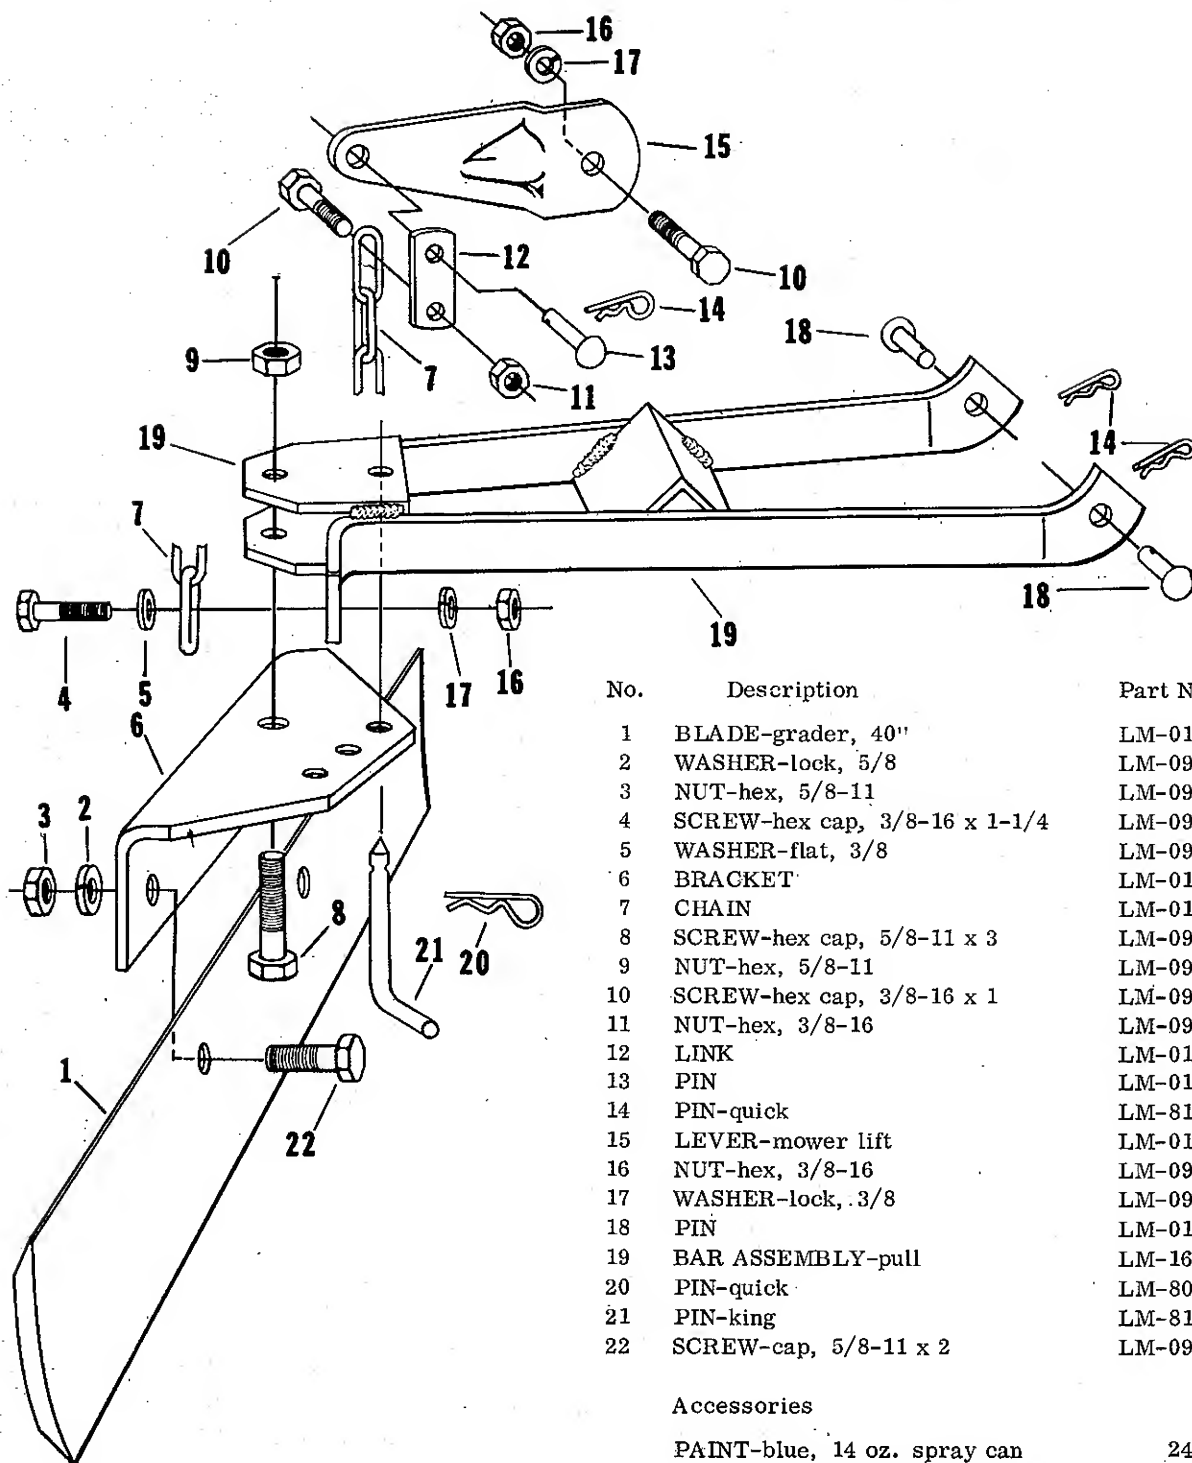

The 40" grader blade is attached to the tractor as shown in the above illustration by following the sequence of steps outlined below.

1. Position the grader blade under the tractor so that the pull bar assembly may be connected to the front hitch bracket of the tractor. Secure in place with two clevis pins and two quick pins.
2. Attach the lift lever to the lift arm of the tractor as shown. Fasten securely with a 3/8" hex head cap screw, lock nut and lock washer.
3. Attach the lift chain and links to the lift lever with a clevis pin and quick pin so that the blade can be lifted high enough to clear the ground when transporting from one location to another.
4. When desired, the blade may be angled to the left or right by removing the king pin and quick pin from the center hole in the pull bar plate. Lock the blade in desired position by replacing the king pin and quick pin when the alternate holes in the blade bracket line up with the hole in the pull bar plate.
